<b>Office Action Summary</b>	Application No. 10/627,104	Applicant(s) WILLIAMS ET AL.	
	Examiner Stephen M. Johnson	Art Unit 3641	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3641

1. Claims 7 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 7, lines 1-2; and in claim 14, line 14; the phrase "the threaded surface" lacks complete agreement with its antecedent. Perhaps the phrase [the threaded region] was intended.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cobb in view of Rocha or JP 2-233998.

Cobb discloses a launch tube assembly comprising:

- |   |                    |
|---|--------------------|
| a) an aft launch tube portion with partially closed rear end; | 26                 |
| b) a transfer sleeve;   | 20                 |
| c) a forward launch tube section; and                         | 22                 |
| d) an adjustable plenum.                                      | col. 2, lines 4-14 |

Cobb applies as previously recited. However, undisclosed is a cap pinned to the forward end of the launch tube. Rocha (26) and JP 2-233998 (26) each teach a cap pinned to the forward end of the launch tube. Applicant is selecting a means known in this art to close the forward end of the launch tube and putting it to use as it is already commonly known to be used in this art. It would have been obvious to a person of ordinary skill in this art at the time of this invention to

Art Unit: 3641

apply the teachings of either Rocha or JP 2-233998 to the Cobb disclosure and have a launch tube with a closed launch tube end.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2 and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Valisko.

Valisko discloses a launch tube assembly comprising:

- a) an aft launch tube portion with partially closed rear end; 19, 16
- b) a transfer sleeve; 17
- c) a forward launch tube section; 20
- d) an adjustable plenum; and col. 2, lines 20-30
- e) a pinned cap. 21

6. Claims 3-6 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 12-13 are allowed.

8. Claims 7 and 14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Harvey and Hollmann et al. disclose state of the art launch tube assemblies.
